EDUCATION

CORPORACIÓN UNIVERSITARIA
AUTÓNOMA DE NARIÑO (AUNAR)

Computer Engineer

February 2018 - June 2023

MY SKILLS

- Python
- Django and DRF
- PostgreSQL
- Postman
- JavaScript (basic)
- Vue JS
- HTML
- CSS
- Bootstrap

LANGUAGES

Spanish (Native)

English (B1)

Nicolás Durango

SOFTWARE DEVELOPER

As a computer engineer graduated from AUNAR, my main focus has been web development and API creation. My experience is centered around languages such as Python and JavaScript, where I have acquired skills that have enabled me to develop personal and university projects in various areas, ranging from data analysis to the creation of websites. Django and Django REST framework (DRF) are my tools of choice in this regard. I consider myself a proactive individual with the ability to adapt to new technologies.

EMPLOYMENT EXPERIENCE

WEB DEVELOPER, FREELANCE.

July 2023 – Present

As a freelance developer, I have experience leveraging my strong skills to create custom software solutions for various clients (for more information, visit my web portfolio). Some of these projects include:

- Comprehensive management system for a gastronomic establishment.
- Efficient Inventory Management Platform.

WEB DEVELOPER, PARQUESOFT TL.

August 2022 – October 2022

During my internship at the entrepreneurship assigned by the organization ParqueSoft Meta and Amazorinoquía, I played a key role in the development of a business web project. My responsibilities included:

- Backend development using the Django framework.
- Management of PostgreSQL databases.
- Web design and layout using HTML and CSS (utilizing Bootstrap).
- JavaScript for animations and interactive functionalities, such as smooth transitions and dynamic elements.
- Version control through Git.
